# Coronavirus (COVID-19) Social Distancing

In these unprecedented times of the Coronavirus (COVID-19) pandemic, JALITE is just as committed to our mission, to help to save lives and reduce risks worldwide.

In our bid to uphold this commitment, we have added new products to our range that are specifically designed to protect essential workers and the public, by facilitating current hygiene and social distancing guidelines.

## SOCIAL DISTANCING

**SAVES LIVES**

## Government guidance recommends

Introducing more one-way flow through buildings. Providing floor markings and signage should remind both workers and customers to follow social distancing wherever possible.

Reducing maximum occupancy for lifts, providing hand sanitiser for the operation of lifts and encouraging use of stairs wherever possible.

Encouraging customers to use hand sanitiser or handwashing facilities as they enter the premises to reduce the risk of transmission by touching products while browsing.

Using floor tape to mark areas to help people keep to a 2m distance.

Providing clear guidance on social distancing and hygiene to people on arrival, for example, signage and visual aids.

## Social Distancing Posters, Notices & Floor Markings

**Handwashing & Respiratory Hygiene**

There are general principles you can follow to help prevent the spread of respiratory viruses, including:

- Washing your hands more often - with soap and water for at least 20 seconds or use a hand sanitiser when you get home or into work, when you blow your nose, sneeze or cough, eat or handle food.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with anyone especially those with symptoms
- Cover your cough or sneeze with a tissue, then throw the tissue in a bin and wash your hands.
- Clean and disinfect frequently touched objects and surfaces.

**HELP STOP THE SPREAD OF VIRUSES**

- CATCH IT**  
Germs spread easily. Always carry tissues and use them to catch your cough or sneeze.
- BIN IT**  
Germs can live for several hours on tissues. Dispose of your tissue as soon as possible.
- KILL IT**  
Hands can transfer germs to every surface you touch. Clean your hands as soon as possible.
