Handwashing & Respiratory Hygiene

There are general principles you can follow to help prevent the spread of respiratory viruses, including:

-  Washing your hands more often - with soap and water for at least 20 seconds or use a hand sanitiser when you get home or into work, when you blow your nose, sneeze or cough, eat or handle food.
-  Avoid touching your eyes, nose, and mouth with unwashed hands.
-  Avoid close contact with anyone especially those with symptoms.
-  Cover your cough or sneeze with a tissue, then throw the tissue in a bin and wash your hands.
-  Clean and disinfect frequently touched objects and surfaces.
