

## CASE STUDY: Extinguisher Hire for Rowing Regatta

### Customer requirements

Our customer needed to arrange the short term hire of a range of portable fire extinguishers for various sites at Temple Meadows at the prestigious Henley Royal Regatta which runs at the beginning of July every year.

### Solution

RES delivered over 100 extinguishers to the customer site, varying from water, CO2, foam and wet chemical extinguishers – all suited to different applications and locations such as guest marquees, toilets, outdoor catering / kitchen units and also portable cabins.

Under British Fire Safety Law - A Fire Risk Assessment must be carried out for outdoor events which will identify specific extinguisher requirements around a site.

### Result

Our customer was able to run another successful year of hospitality for it's rowing regatta guests and staff, safe in the knowledge that our extinguishers were at hand in the event of a fire.
