

## CASE STUDY: Fire protection equipment for Shopping Centre

### Customer requirements

Our customer needed to have fire protection equipment installed for a new shopping centre in the South of the UK. This large, modern leisure mall and indoor shopping centre opened in 1999 and spans over 7600m<sup>2</sup>.

It contains over a hundred retail outlets on three levels, two multi storey car parks plus various service areas and staff spaces.

### Installation

RES have provided over 300 fire extinguishers, signage and other serviceable fire safety equipment at various specified locations of this prestigious shopping centre such as public shopping areas, car parks, stairwells, fire exits and also non-public areas such as service areas, electrical rooms, staff accommodation and access points.

### Servicing

RES manage the timely and methodical service of all the fire protection equipment with an annual service visit. Our engineers follow a detailed service plan to ensure every item is passed for use and a certificate is issued against all of the equipment.

### Reliable and professional service

From its opening day, RES has been the chosen partner in the provision of Fire Protection Equipment for this prestigious shopping centre. Our reliable and professional service ensures the site is safe and ready for business, 7 days a week.
