

Project Spotlight

Intelligent Hybrid Fire Detection & Alarm System for School

Our customer had acquired a victorian property which needed to be converted from a residential premises to an educational facility.

RES were asked to propose the design of a suitable fire alarm solution. Being of listed status, the solution needed to be in harmony with the heritage of this building, with its thick walls, high ceilings and complex layout

Read the full case study [here](#).

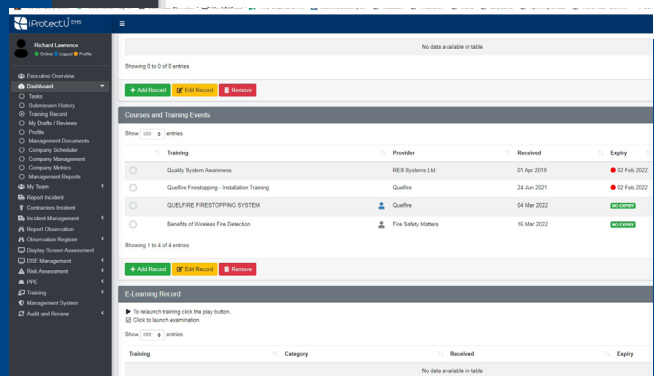

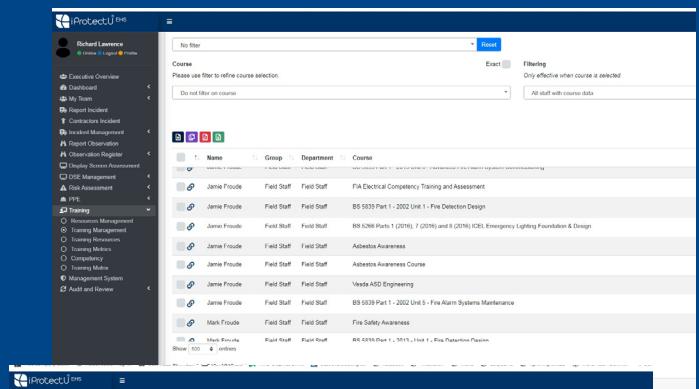

Continuous Personal Development Platform (CPD)

RES have implemented the iProtectu EHS Solution which delivers a cloud based platform to manage our Staff Training, Employee Certification and the tracking of Continuous Personal Development (CPD) of all staff.

The intuitive and innovative platform enables staff to see their own qualifications, certifications and training records. The platform also provides staff access to eLearning modules for Health & Safety requirements.

Detailed tracking, alerts and reminders will help us to ensure our staff are always on track.

The platform is also now a valuable central resource for the various British Standards, Method Statements and Technical Guides.

📷 Sponsorships

Alton Youth Ninjas 2021/22
Winners of the Under 11's Winter Festival
on 30th January 2022!

Twyford Comets U16 Blacks 2021/22

TWINTOWN CHALLENGE 2022
RES provided sponsorship for the Blenheim Palace entry in this charity car event in May in aid of Special Effect.

📱 Digital Transformation

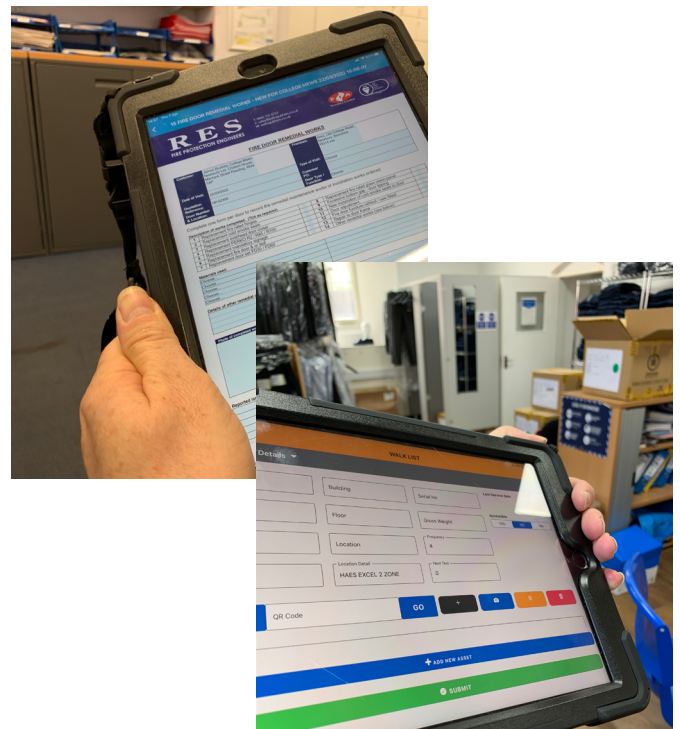

All RES Engineers are now equipped with iPADS.

At present all engineers are now producing digital certificates and surveys. Eventually all service job data including asset management and job scheduling will be undertaken on the iPad.

RES are working closely with iProtectu to develop our own Customer Service Platform which is currently being tested in the field.

Some of the benefits of the digital transformation being undertaken are:

1. Improved accuracy of certificates and surveys
2. Improved speed of job documentation internally and to our customers
3. Real time asset data updates, improving the accuracy of service jobs
4. No more lost paperwork
5. Improved tracking and audit trails.

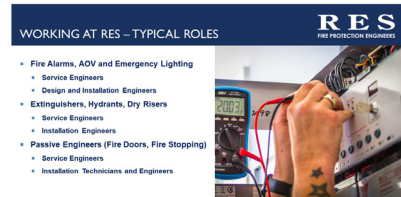

New Staff

We welcome back **Jamie Froude** to the Service Team. Jamie is a highly experienced Fire Alarm engineer and we are glad to have him back!

We are currently inducting a new **Trainee Fire Protection Engineer** who will undertake various FIA courses in order to become a qualified service and maintenance engineer.

Alliances

RES are currently working with Activate Learning to help develop a learning pathway for fire protection engineers in the future. Earlier in the year RES contributed to a Virtual Careers Fair which provided attendees with a top level presentation about working at RES.

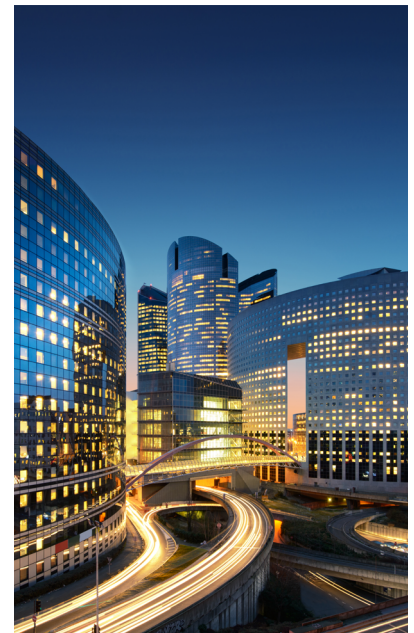

Activate Learning run a number of Colleges in the Oxfordshire, Berkshire and Surrey.

Fire Industry News

The Building Safety Bill

The Building Safety Bill on the 28 April 2022, received Royal Assent becoming the Building Safety Act 2022. The Act brings into life the Building Safety Regulator, with powers of enforcement in terms of the new building regime system, a Construction Products Regulator, with new powers over construction products, and a Home's Ombudsman, to assist residents.

Although debate and amendment of the 252 page Act has seen numerous alterations, including notably the removal of the Building Safety Manager, the substance of many of the Independent Review of Building Safety report's other recommendations remain. The concept of the 'golden thread' approach to secure building information and duty holders requirements for accountability remain together with other clear duties for wider building safety. Secondary legislation to implement the Act's many provisions will now follow.
